

Environmental, Quality, Health and Safety Policy

- eCycleSecure is committed to delivering a quality product to its customers while protecting the environment and the health and safety of those that interact with our operations and the material we generate. Through continuous improvement, the Company will ensure that operations deliver on the following principles:
- Meeting all applicable laws and regulations, including the Basel Convention's prohibition on the exporting of hazardous electronic wastes in violation of the receiving country's laws.
- Maintaining environmental, health and safety standards throughout the processing chain down to final disposition.
- Operating in a manner consistent with SA 800 and other social accountability values including prohibiting prison and child labor, and encouraging the same throughout the recycling chain
- Delivering services in an open fashion including disclosing data security and privacy services to our customers
- Operating within the recycling hierarchy of Reuse, Refurbish, Recycling and only then Disposal, with no hazardous, focus or problematic materials ever landfilled or incinerated
- Ensure that hazardous, focus and problematic materials are processed in licensed and permitted facilities using technologies that minimize releases and do not include solid waste landfills or incinerators for Final Disposal
- Committing to continually reviewing and improving on operational, quality, environmental and health and safety goals and objectives.
- Meeting all RIOS customer requirements for both service and product delivery
